

Buyer Catalogue Management

Is managing catalogue data a real headache for you?

Maintaining product and Supplier data is an important way to control spend and remain compliant, however it can be a significant drain on resources.

Why not let someone else do the work for you and free up resources which could be better used elsewhere?

- **A safe pair of hands:** Our dedicated UK-based team has 15 years' experience of maintaining Suppliers' product and pricing data. Our team currently manages 11.1 million items for Suppliers. Accuracy, reliability and discretion are at the heart of our services.
- **Improved usage and data quality:** For Buyer managed catalogues, we can move them into our eMarketplace, classify your data, load in product and price files and improve your catalogue data quality. Improved data can help you negotiate better pricing.
- **Contract management:** It can be difficult to keep on top of contract expiry dates and contract compliance. Our team can take the stress away for you by setting up renewal alerts, chasing Suppliers for updates and providing you with well classified data so you can easily enforce contract compliance.
- **Managed Spend Savings Report:** With reams of data, reviewing spend isn't always straightforward. We can provide you with a monthly spend review, clearly identifying savings and implementing changes to the catalogues to help you realise those savings.
