

# Managed Spend Savings Report

## Want to unlock vital spend information and realise more savings?

Our Data Quality Analysts can provide you with a Managed Spend Savings Report on a monthly or ad hoc basis, analysing key areas of spend against specified Suppliers.

### Are you missing out on savings?

Sense checking your spend data to identify if you are buying the same items from multiple Suppliers can be a lengthy task, especially if you have limited time and resource.

Allowing our experts to run, and provide you with, a fully formatted report will give you the information you need and means you can spend more time realising the savings that are there to be made.

### What will the report do?

Our Managed Spend Savings Report helps to unlock savings for Buyers ordering the same items through multiple Suppliers. The report returns a list of duplicate products including the manufacturers part number, catalogue number and current price.

When the report is run for a particular category (maximum of 10 Suppliers), it highlights the cheapest option and gives you the opportunity to react accordingly, be that to deselect the most expensive items or use the information in future contract negotiations to reduce costs. Extensive deselection can take time but this is something that can be carried out by Science Warehouse.

### What are the benefits?

- Analysis of specified categories on a monthly basis or ad hoc basis.
- Extensively mined and formatted data - some reports can include over 100,000 items!
- Identification of clear potential savings.
- Suggestions on how to unlock additional savings.
- Review and sense check of your current prices, so you can be safe in the knowledge that you have the most competitive price.
- Item deselection carried out by Science Warehouse.
